CAREER OBJECTIVE

As a fresher, I am seeking for a role which allows me and my passion to contribute to a dynamic and innovative team where I can apply my key skills (problem solving, analytical skills, Communication skills) and continuous learning and grow in a challenging environment. I am excited to contribute my enthusiasm, and commitment to the success of the organization.

SKILLS

Python, Basics of Java, SQL, Basics of HTML.

Team Lead capabilities, Problem solving, communicative abilities, Project management, Attention to detail.

PROJECTS

- Developed a device which is **"INTELLIGENT CHILD SAFETY SYSTEM USING IOT"**.
- The objective of our project is to provide parents and caregivers with reliable and advanced technology solution that ensures the safety and well-being of children
- Pulse sensor is used to monitor the pulse and DHT11 sensor is used to monitor temperature and GPS is used to track the location of child.
- The pro's of our project are :
 - Enhanced Safety
 - Remote Monitoring
- Designed a device which is **"WATER LEVEL INDICATOR WITH AUTOMATIC ON OFF DC MOTOR"** which is based on transistors and DC motor
- Our main objective of this project is to control the wastage of energy and water
- The pro's of our project is that
 - This device is power saving due to perfect timing of water pump operation
 - This device is automatic which reduces human efforts
 - It is cost effective and easy to implement as well.
